Workshop on Vedic Maths for Classes IX and X

A workshop on Vedic Mathematics was organized for Classes IX and X. The objective of the workshop was to facilitate the students with Smart Calculation Techniques. They were acquainted with some techniques of Subtraction, Multiplication, Addition, Fractions and various other methods of quick calculation in no time. The students were also acquainted with the various techniques for improving memory and concentration. The students enjoyed the session as it exposed them to various ways of calculations and also enabled them to develop confidence and a positive approach towards the subject.
