

# Principal's New Year Message

*A new year ..... A new Beginning*

Another year has begun bringing in new hope and enthusiasm. It's with true humility that I look forward to 2012 which will bring its new challenges. There will be many more celebrations and events filled with opportunities and possibilities for each and every Modernite. So, we should forget about our past and its daunting memories and wish for a new start. I would advise you on this New Year to greet each day as an opportunity to meet new challenges.

*Here are some suggestions to make this year your greatest success:*

- Become more independent and be meticulous and systematic in your work.
- Fix your targets by setting up your priorities and put your goals in writing.
- Be positive in your approach and keep negative thoughts aside.
- Be nice to your parents, teachers and elders and show respect to them.
- Take care of your body through physical activity and nutrition.
- Read at least one book per month.
- Be careful while making friends. Avoid bad company.
- Do not use abusive language while communicating with each other
- Volunteer to help others in need.
- Practice life skills and reduce stress.
- Do something quotable this year and inspire others to do such deeds in the years to come.

May this New Year bring new opportunities in your way to explore every joy of life and may your resolutions for the day ahead stay firm, turning all your dreams into reality and your efforts into great achievements. Let us leave behind what we don't need to carry .....*grudges, sadness, pain, fear and regrets.* Let us remember that life is beautiful and we need to enjoy it.

**“Happy New Year 2012”**
